USER GUIDE

Copper Notes

AI clip-on recorder that summarizes your conversations

About this guide

For Copper assistant version 2.3. Edition 2026.1. Specifications, warranty and support details are on the last page.

> **NOTE** Error codes are on page 8. You can also ask the Copper Crew, our support team, in the Copper app: **Settings > Help**.

1 Meet Copper Notes

Never take notes again. Clip on Copper Notes and Copper turns your meetings, lectures, and ideas into clear summaries and to-do lists.

1.1 What's in the box

- Copper Notes recorder
- Copper-colored charging puck
- USB-C cable
- Quick start card

1.2 Parts of your Copper Notes

Part	Where it is	What it does
Center button	Front	Touch-sensitive. Tap to start or stop, double-tap to pause
Recording ring	Front, around the button	Glows amber while recording, so everyone nearby can see
Magnetic clip	Back	Clips to a shirt, bag strap, or lanyard
Charging contacts	Back	Sit on the charging puck to charge

Copper Notes is about 1.5 inches across and comes in Brushed Copper, Desert Sand, and Night Sky.

2 Charging and battery

Place Copper Notes on its charging puck, contacts down. The magnet lines it up. Connect the puck to a USB-C power adapter with the included cable.

Battery fact	Value
Recording time	Up to 12 hours
Standby	Up to 7 days
Full charge	About 90 minutes
Low battery	Ring turns orange below 20%

2.1 Make it last a full day

- A long conference day can use more than one full charge. Top up on the puck at lunch: 20 minutes adds about 3 hours of recording.
- Pause (double-tap) during breaks instead of leaving it recording.
- Heat drains the battery. Keep Copper Notes out of direct sun.

> **IMPORTANT** Never leave Copper Notes in a parked car or on a dashboard. It protects itself from heat by shutting down (error C-63, page 8).

3 Set up Copper Notes

1. Place Copper Notes on its charging puck.
2. Open the Copper app on your phone and tap **Add Device**.
3. Choose **Copper Notes**.
4. Hold the center button for **3 seconds**, until the ring flashes green.
5. Follow the prompts to connect to your Wi-Fi.

3.1 Why Copper Notes needs Wi-Fi

Copper Notes records and transcribes without Wi-Fi. It uploads transcripts to the Copper app the next time it's on Wi-Fi, usually while charging. If it can't upload for a long time, its storage fills up (error C-31, page 8).

3.2 Change Wi-Fi networks

In the Copper app, go to **Devices > Copper Notes > Wi-Fi** and tap **Change network**. Keep Copper Notes on its puck while it connects.

> **NOTE** Error **C-12** means Copper Notes can't reach Wi-Fi or the password is wrong.

4 Recording

To do this	Do this
Start recording	Tap the center button. You'll hear the Consent Chime and the ring turns amber
Pause	Double-tap. The amber ring pulses slowly
Resume	Double-tap again
Stop	Tap once

4.1 Recording modes

Choose a mode in the Copper app before you start. The mode changes how Copper writes your summary.

Mode	Best for	You get
Meeting Mode	Team meetings and calls	A summary, decisions, and action items
Lecture Mode	Classes and talks	Organized notes with key terms
Idea Mode	Quick voice memos	Tidy notes from your thoughts

4.2 Recording other people

When recording starts, Copper Notes plays the **Consent Chime** and lights the amber ring so people know. You are responsible for following local recording-consent laws. Some states require **everyone** in a conversation to agree to being recorded. When in doubt, ask first.

© 2026 Copper State Labs, Inc. · Fictional company and documents, for educational use only.

5 Summaries and the Copper app

Copper Notes transcribes your recording **on the device**. Only the text goes to the Copper Cloud to be summarized. When your summary is ready, the ring flashes green briefly and the summary appears in the Copper app.

5.1 What you can do in the app

- Read the summary, decisions, and action items
- Read the full transcript with speaker labels ("who said what", added in Copper 2.3)
- Share a summary by email or link
- Delete a recording, transcript, or summary

> **NOTE** Speaker labels are good, not perfect. Before you share a summary, check that each decision is credited to the right person.

5.2 Free plan and Copper Plus

	Free plan	Copper Plus
Recording	Up to 10 hours a month	Unlimited
Summaries	Standard summaries	Standard and long-form summaries
Search past meetings	No	Yes, across all your recordings
Transcripts and summaries kept	30 days	12 months

© 2026 Copper State Labs, Inc. · Fictional company and documents, for educational use only.

6 Lights and privacy

6.1 Ring lights

Ring	What it means
Amber, solid	Recording
Amber, slow pulse	Paused
Green, brief flash	Summary ready in the app
Orange	Battery below 20%
Red, flashing	Error. Check the app for an error code and see page 8

In very bright sunlight the amber ring can be harder to see. When you record outdoors, tell people that Copper Notes is recording.

6.2 Your data

- Recordings are transcribed on the device. Transcripts and summaries are stored for **30 days** on the free plan and **12 months** with Copper Plus.
- Delete any recording, transcript, or summary anytime in the Copper app.
- Copper State Labs does not sell your recordings, and doesn't use them to train models unless you opt in.

7 Troubleshooting and error codes

When the ring **flashes red**, Copper Notes has a problem. The Copper app shows an error code.

Code	What it means	What to do
C-12	Wi-Fi connection lost, or the Wi-Fi password is wrong	Re-enter your Wi-Fi details in the Copper app. Move closer to the router
C-31	Storage full: recordings haven't been uploaded yet	Connect to Wi-Fi and open the Copper app to upload your recordings
C-63	Temperature protection: too hot to operate, for example after being left on a car dashboard	Move it to a cool place for 30 minutes. Never leave Copper Notes in a parked car
C-90	Software update failed	Put Copper Notes on its charger, keep it on Wi-Fi, and retry the update in the Copper app

7.1 Common problems

Problem	Try this
The ring doesn't light up	Charge it on the puck for 15 minutes, then tap the center button
No summary after a recording	Make sure it's on Wi-Fi. Summaries appear after the transcript uploads

7.2 Factory reset

Hold the center button for **20 seconds** while Copper Notes is on its charging puck, until the ring flashes red twice. This erases recordings that haven't been uploaded.
